

We make neighborhoods work.*

1 in 6 over 65 yrs old

By 2050, for the first time in human history there will be twice as many 65+ adults than children under 5 years of age.

Caring for families takes amazing effort. Eaton helps improve patient care with always-on, efficient power that controls costs, maximizes comfort and enhances safety.

\$6B to power schools

The annual energy bill to run America's primary and secondary schools is a staggering \$6 billion—more than is spent on textbooks and computers combined.

Schools are the center of any community. That's why Eaton works hard helping educational facilities reduce energy costs, letting them put more money where it's needed most.

+150% increase in air travel

By 2030, distances traveled by commercial aviation are predicted to increase by almost 150%.

Visiting relatives, traveling for business or just going away on vacation? Eaton solutions for aerospace are there helping make air travel more efficient and reliable.

350M streetlights

Adding sensors to the approximately 350 million street lights worldwide can form the foundation for intelligent, connected cities.

And getting reliable power to those cities helps sustain an always "on" world. Eaton helps municipalities to modernize their systems to ensure a resilient, safe and cyber secure utility grid.

30% of all vehicles

By 2040, about 30% of passenger vehicles worldwide will be electric.

Electric vehicles mean better air quality and reduced noise levels for urban neighborhoods. Eaton's EV power distribution, power electronics and power system technologies enable reliable electric vehicle operation.

* From the technology that surrounds us to the critical services and infrastructure we depend on every day, neighborhoods around the world rely on safe, efficient, reliable power management. And anywhere you look, you'll find Eaton making sure neighborhoods never stop working.

70% of all U.S. freight

Each year, \$671 billion of manufactured and retail goods are transported by truck in the U.S. alone.

Online shipments and daily deliveries keep families going, businesses running and the economy moving. Eaton is on the road helping delivery fleets reduce fuel consumption and emissions.

+65% building energy use

By 2050, global energy demand in the building sector is projected to increase by 65%.

Eaton helps builders design new, energy-efficient buildings or modernize older ones to reduce energy costs and improve sustainability.

75 billion connected devices

By 2025, the number of Internet of Things (IoT) connected devices is expected exceed 75 billion worldwide.

Working, shopping, streaming entertainment, connecting with friends—every day we live more of our lives online, and Eaton helps power and protect the data centers, networks and devices that keep us all connected.

+3 lbs. of trash per person, per day

Every day, the average person generates about 3.13 lbs. (1.42 kg) of waste.

Garbage is a fact of life. Luckily, Eaton helps communities reduce the cost of maintenance and fuel consumption for refuse truck fleets, while extending their service life.
